Value chain analysis in the real world

How has COVID affected the coffee/cocoa value chains?

How has COVID affected labor dynamics in producing countries?

Value chain analysis and the sustainability agenda of the next decade

Some pointers when doing VCA in the real world

- Context, context, context
- Identify the right mix of stakeholders to interview
- Get diverse opinions
- Carry a USB drive (people never email data after you leave)
- Official statistics aren’t always accurate
- Corroborate numbers with different sources
- Go bottom-up and top-down
- Talk through hypotheses with experts
- One-size-fits-all solutions are rare; segmentation is usually needed
- Keep slides simple
